SPEIRS MAJOR

We sought to create a variety of vibrant and celebratory after-dark experiences, combining dense urban places with darker natural open spaces, and routes where light is used theatrically to enhance the experience of the unique setting.

SPEIRS MAJOR

Our scheme focuses on keeping light levels as low as possible without compromising safety and security. This includes a deliberate gradual reduction in light intensity as you approach the waterfront, allowing the eye to adapt to the lower levels so that visitors can best enjoy the waterfront reflections and intimate al fresco dining.
