

Camille studied at the Ecole Nationale d'Architecture, gaining her HMONP qualification as a Chartered Architect.

After participating in an exchange study year at California Polytechnic State University, Camille became interested in working with light after taking a Stage Design class, where she found the transformation of a space using light fascinating.

Camille joined Speirs + Major in 2016 and was promoted to Project Designer in 2018. Shortly after joining, she won two out of three awards with her fellow S+M teammates at the 'Ready, Steady, Light' competition held by the Society of Light and Lighting.

Camille has worked on a number of international projects including a masterplan in the Middle East. She is currently working on a college chapel in Cambridge, Broadgate in London and the Battersea Power Station development.

A French native, Camille speaks both fluent French and English. In her spare time, she likes to paint and play the piano.
