

Luciana studied Architecture at the University of Southern California. Having always had an interest in the choreography of people through spaces, much of Luciana's studies focused on the opportunity for variable experiences to exist within the built environment, through which the importance of light and materials in enhancing atmosphere and creating comfortable spaces became apparent.

Luciana started at Speirs + Major in 2015 and was promoted to Senior Designer in 2018. She has worked on a number of projects including the Elephant Park, London development, a sustainable power plant in central Copenhagen, Denmark and the lighting strategy for the City of London.

She is especially interested in projects with bespoke details and elements of choreography and storytelling embedded into the concept and design.

Luciana is fluent in English and Spanish and is looking forward to widening her international experience having lived in Los Angeles, Berlin and now London.
