

Youmna studied Interior Architecture at the Lebanese Academy of Fine Arts in Beirut and Interior Design at The Scuola Politecnica di Design, Milan. Being brought up in Lebanon, she frequently had to deal with long hours of daily electrical shortages, which sparked Youmna's interest in light and darkness.

Youmna joined Speirs + Major in 2016 and is currently assisting on several large projects including an airport expansion. She especially enjoys working on projects in which light reveals the best in architecture design.

An avid humanitarian, Youmna headed a project in 2015 to raise awareness about Light Poverty in precarious areas of the world which won her the title of Young Lighter of the Year 2015.

Youmna is passionate about watersports, and also loves hiking, travelling and landscape photography. She is fluent in French, Arabic and Italian.
